## **“NEWS RELEASE”**

### **MEGASTAR ACQUIRES MORE GROUND IN QUEBEC 100% Owned Ralleau Property Now Represents Over 9,400 Hectares**

Megastar Development Corporation (TSX-V: **MDV**; Frankfurt: **M5Q**) reports that it has claimed an additional 37 cells contiguous and to the southeast of its Ralleau copper zinc project, located northeast of Lebel-sur-Quevillon, Quebec.

Dusan Berka, Chair of Megastar states: “These 37 new claims bring Megastar’s total number of claims for the Ralleau property to 166, and increase the land under control by an additional 2,084 hectares for a total of 9,400 hectares. The additional staking is the result of regional compilation and recent work on our Ralleau Property which suggests a much more extensive favorable volcanic belt than originally interpreted. Located just south-east of the producing Langlois mine in the Lebel-sur-Quevillon camp, Quebec, the area is already known as fertile ground for volcanogenic massive sulfide (VMS) deposits. Considering that VMS deposits generally come in clusters, we have applied a larger scale perspective to the area in order to locate all favorable targets for drilling.”
