## **“NEWS RELEASE”**

### **MEGASTAR REPORTS EXPLORATION HAS COMMENCED ON ITS BC SEDEX ZINC-LEAD PROPERTY**

Megastar Development Corp. (TSX-V: **MDV**; Frankfurt: **M5Q**), is pleased to announce that Mantle Resources Inc. has begun its regional exploration program on the southern half of a 180 kilometer long package of zinc-lead properties, in the world-class Kechika Trough within the southern-most part of the regional extensive Paleozoic Selwyn Basin, one of the most prolific sedimentary basins in the world for the occurrence of SEDEX zinc-lead-silver and stratiform barite deposits, located in northeastern British Columbia. Lundin Mining has committed significant financial and technical resources to this region as it holds a just under 10% equity interest in Mantle. Initially, Mantle's regional work program will be focused entirely on Megastar's highly prospective properties (18,198 hectares), held under option by Mantle. By expending \$2.25 million on exploration and development Mantle can earn a 60% interest in these, all of which encompass shales of the 'Gunsteel' formation and a number of zinc-lead showings.

Megastar's 100% owned SEDEX zinc-lead properties are situated adjacent to and along strike of the favorable geology, which is host to several well known zinc-lead deposits including Cirque, South Cirque and Driftpile (all owned by Teck Cominco), with a combined geologic inventory in excess of 65 million tonnes averaging approximately 10% combined zinc+lead, which occur in 'Gunsteel' rocks to the northwest of Mantle's nearby Akie deposit where recent drilling has intersected high-grade SEDEX style zinc-lead mineralization.

#### **ABOUT MEGASTAR DEVELOPMENT CORP.**

Megastar Development Corp. is an emerging resource company engaged in the acquisition, exploration and development of mineral properties in Quebec and British Columbia. Megastar is listed on the TSX Venture Exchange under the trading symbol "MDV" and on the Frankfurt Stock Exchange under the trading symbol "M5Q".
